## WORK EXPERIENCE

### **Data Integration & Analytics Global Practice Lead**

Datavail - Broomfield, CO - August 2015 to Present

Breaking the status quo supporting the world's largest infrastructures in database & application performance tuning to build, grow and manage a team of US & Offshore (Mumbai & Bangalore India) developers and tuners. Working with a consultative approach onsite with customers from the east coast to the west coast applying my broad background in process automation, database application development, analytics, optimizing database performance and many DevOps tools & Processes. Architecting projects and creating schedules, costs (salaries, P&L, partnerships, subcontractors), managing expectations & resources. Managing & Overseeing Development projects for SQL Server, Oracle, Splunk, Informatica, SSIS, SSRS, Analytics, OBIEE, Oracle EBS, PostgreSQL, .NET C#, Web Development with PHP, Java/JSP, Informatica, MongoDB, SlamData, Hadoop, HiveSQL, R, Presto, Impala, Oracle APEX & Microsoft Technologies. Work with Sales & Marketing to develop and present product strategies & new team capabilities or offerings.

Implementing or consulting on Continuous Integration solutions for Splunk, MongoDB, .NET, PHP, Apache, JVM, R, PLSQL, NoSQL, TSQL, PostgreSQL and other open source technologies. Handling conflict resolution with customers when projects don't go well or when revenue recovery is needed. Facilitating full enterprise solutions for C-level, Director & IT Manager level needs around business transformation.

Developing new business through relationships and exploration with new technologies, industry front runners. Drive business transformation, forward thinking approaches to development, presenting new ideas, out of the box or approaches at conferences and mentoring.

### **Senior Oracle EBS (Full Stack) Performance Tuner & DevOps Product Manager**

Datavail - Broomfield, CO - April 2011 to August 2015

Lead the world's largest retailer tuning initiative for their logistics & shipping application providing leadership around full stack performance discovery & implementation for Informix, Java, XAML & HP Loadrunner. Acted as Datavail DevOps Product Manager for Internal customer facing products as well as consulting on customer product development, positioning and strategy. Built a DevOps team to support database monitoring product utilizing custom written tools, OctopusDeploy & SCRUM/Agile processes. Managed the development of an Oracle Analytics Monitoring Intelligence product conversion from prototype Excel spreadsheets into a fully web enabled analytics product built on open source tools. Managed subcontractors, budgets & expenses to deliver customer and internal development solutions across the company.

In support of multiple EBS instances for many customers: decompiled, debugged & wrote java, jsp and oracle forms for potential causes for system slowdown, problems causing garbage collection issues, growing connection pools and various other system problems as they arise. Used Splunk & Arcsight to review for vulnerabilities and transaction details as well as for data discovery and big data visualization out of Oracle EBS. Utilized AppDynamics, Splunk, Arcsight & HP Performance Tools as well as VisualVM for java JVM performance tuning. Experience in: Oracle 9i, 10g RAC, 11g, 12c, SQL Server 2006 – 2014, Postgres 8-9.6, some Informix, AS400 & DB2.

### **Senior Full Stack Java Application Developer**

Northrop Grumman Corporation - Warner Robins, GA - June 2009 to April 2011

Using proprietary APIs, developed html/javascript GUIs for customer interaction with proprietary document management systems for DOD. Created java servlets, applets, java beans integrating them into a J2EE web based environment running on Apache Tomcat on top of Oracle 10g & 11g RAC. Used Netbeans Java Profiler and VisualVM to help debug complicated data & java problems and provided coding solutions to improve user experience, document management & data integration of older systems helped to migrate to newer thin client alternatives (i.e. web apps).

### **Senior Full Stack Java Developer**

CDO Technnologies - Warner Robins, GA - January 2008 to May 2009

Worked with Air Force & DOD to support proprietary Java based web application created and maintained business workflows for Configuration Management of C5 aircraft. Worked directly with the Director of Configuration Management for C5 in supporting his efforts in improving user experience, java API programming and deployment of usable workflows for C5 maintenance. Utilized NetBeans 6.x, Java, JSP, JSTL, Custom Tag Lib, Applets, Servlets, JavaBeans, HTML, Javascript, CSS & PLSQL to develop custom web based solutions.

### **Full Stack Developer & Manager**

SPINEN, Inc - Macon, GA - May 2006 to February 2008

Managed projects, budgets & customer relationships of the software development business side. Set business goals, developed marketing materials, handled sales calls, met with clients, gathered requirements, managed project costs, timelines & resources then finalized proposals and presented to clients. Worked short timelines, complex data sets, multiple taxonomies and learning new environments. In addition to the project management & management other developers time was spent designing web interfaces in Photoshop & Fireworks. Utilized CSS, HTML 4, Flash, Actionscript, PHP, .NET C#, SQL, MySQL and/or XML. Projects included flash based mapping tools, UI design for phase monitoring & voltage tracking system, various web brochures, graphic design for print.

### **Senior Full Stack Developer**

SAIC (Scientific Applications International Corporation) - Warner Robins, GA - November 2003 to December 2006

Developed in C#.NET, ASP, TSQL, HTML4, javascript, Flash & Actionscript in support of U.S. Air Force applications; designed, developed & delivered training materials; converted business requirements into web-based applications; designed & created all necessary graphics using Photoshop, Illustrator & Flash

### **Web/Multimedia Developer**

ComputerLogic, Inc - Macon, GA - April 2003 to November 2003

Responsibilities included managing customer facing websites in ASP, VBScript, TSQL, SQL, C#.NET, ADO.NET, HTML, CSS, and Javascript; supported product development efforts specific to User Interface enhancement; creating graphical look & feel as well as designed the promotional packaging; developed software training.

### **Information Architect**

The Network Inc - Norcross, GA - November 1999 to February 2003

### **Creative Director & Full Stack Developer**
